

## 12 Volt Truck Vibrator Timer 197266

### Operation

- The timer will limit the maximum run time of the vibrator to 45 seconds.
- The timer will provide a cool down time of twice the run time.  
Example: Vibrator runs for 30 seconds, cool down time is 60 seconds.

### Installation

- See wiring diagram above.
- Use .250" diameter hole for mounting.
- Make secure wiring connections.

### Benefits

- Prevents vibrator overheating and equipment damage by limiting vibrator run time to 45 seconds.
- Provides cool down time to extend vibrator life.
- Can easily be retrofitted into a current truck vibrator installation or used in a new installation.
- Small 2" X 2" size mounts easily and out of sight next to the vibrator solenoid.
- Timer is nonadjustable to prevent tampering.
